

What We Do

Local Hosting

We operate a Surrey-based Data Centre, that is local to Guildford and the surrounding area. Many of our customers value the convenience, not only of having their hosted services local to their offices, but also no longer having to fight their way through London should they need to work directly on their systems. If you need local hosting, or maybe a secondary site away from your London-based hosting, please give us a call. Tailored Services

DMGi are proud to offer more than a "one-size fits all" style of service. We have a set of standard services that we can offer to customers, but that is only the tip of the iceberg. We are always happy to put together a solution that is tailored to your requirements - we believe it is our professional responsibility to offer you a variety of options to suit your requirement and budget, and to fully discuss and understand your business needs. We believe in working with our customers to provide a system that is suitable for their exact requirement. In a world of fixed options, we feel this sets us apart from our competition. Technical Support

Here at DMGi, we are proud of our Technical Support team, and the service they provide to our customers. We have a policy of not operating a support call-centre. Instead, your support calls are answered directly by our Technical team - the same team that looks after the Data Centre and both our servers and our customers servers. There are no call sheets or scripts in use here at DMGi. Contact Us

If you want to know more, or you're ready to talk about your requirements, please call us on (01483) 407877 or email us at support@dmgi.co.uk
