

Services

We are committed to giving all our customers exactly what they want - whether that's a basic email service, a dedicated server or something completely bespoke. We specialise in people first and machines second. We'll work with you to decide what the best solution for you is, and we will be available to provide all the support you need, when you need it. You'll also find that we're proactive too and we will be in touch to let you know of emerging technologies, security updates and to provide general advice. Below is a brief list of some of our services.

- **ISP Services:** Simple website solutions, email and domain name management. Whether you need one or a combination of these services we can help. For more information [click here](#)

- **Data Centre Services:** Dedicated, Managed or Co-Location servers hosted on your choice of Virtual or Private hardware. Suitable for any requirement, with the ability to deploy and manage these servers in our Data Centre or at your chosen place of business. Typical configurations include; dedicated mail servers, large custom databases, secure online shops and large corporate websites. We are specialists in Windows and Linux environments. For more information [click here](#)

- **Workstation, Server, System and Network Consultancy:** We also offer on-site consultancy for new or existing corporate networks. Our consultancy services include; diagnostics, fix and support, optimisation, data cleansing, or new builds to enhance the way you run your business. For more information [click here](#)

All of our services are explained on the pages within this section. Please have a look through and call 01483 407 884 or email sales@dmgi.co.uk when you are ready to discuss your requirements.
