

Virtual Managed Server

If you have outgrown your shared web hosting solution but are not quite ready to move on to a full dedicated server, then a Virtual Private Server may provide the ideal solution.

A Virtual Private Server gives you the features and functionality of a full Dedicated Server however you benefit from a lower monthly cost by sharing system resources such as the CPU.

Â Virtual Private Server Features

- Low monthly cost
- Host multiple domains
- Install your own software
- Full root access to your OS
- Full system reset on request
