

Virtual Private Networks

Virtual Private Networks (VPN)

With broadband, 3G, GSM, Wifi Hotspots and laptops becoming more prevalent today, the scope to work away from the office has become a real possibility. However wouldn't it be really useful if your staff could connect to your internal fileshare's, printers and network devices while on the road, or connect two offices and let your users share files without the hassle of emailing them?

DMGi can provide a secure seamless integrated solutions that utilises industry standard SSL/TSL, IPSEC or PPTP protocols with certificate, smart card and/or 2-factor authentication to make this a reality.

We have a range of solutions that can be tailored to your needs and price.
